ment, but shamefully treacherous to its cause, are exerting their utmost endeavors to deliver New York into Tammany's hands, and thereby to insure the victory in the next election of the dangerous and socialistic forces whose defeat one year ago is now being so joyously celebrated throughout

No Third Party Man Has a Chance.

The next Mayor of New York of necessity must be a Republican or a Tammany Democrat, and every vote not cast for the Republican candidate is a vote to undo all the good work that has been done by the Republican party in State and nation.

Republican State Committee warns the electors within the city of York, who are so dismayed by the Chicago platform, and the dangers which it exposed their business and their homes, and who are now congratulating themselves upon the vote they cast for McKinley, not to be misled in easting a vote, which, however well intended, is bound to count Tammany Hall and for the success of the Chicago platform in 1900. The Republican party, which is so, wisely administering the National Government at Washington and the State Government at Albany, can be relied upon to wisely administer the government of the city of New York. And he shallow theories and the vain pretences to which the so-called Citizens' Union is seeking to dissipate the anti-Tammany majority in New York, ought not to succeed in withdrawing from the Republican candidate and the Republican platform the support of a single McKinley voter.

It is a striking circumstance, and which enforces its own lesson, that Tanimany Hall and the Citizens' Union are both persuaded that national Issues have nothing to do with municipal affairs. The silly doctrine of nonpartisauship has always meant an invitation to Republicans to desert their party, while the Democrats get together the more unitedly for theirs. Every vote which it succeeds in subtracting from the support to which the Republican party, as the party of sound and competent government, is en-titled, is a vote to destroy the only party and the only party organization through which the defeat of Tammany Hall can now or hereafter be made

The only State officer to be elected this Fall is a Chief Judge of the Court of Appeals. In submitting to the people the name of the Hon. William J. ace, now a member of the Federal Court, the Republican party shows its high appreciation of the qualities that should be found in a presiding se of our highest State tribunal. Judge Wallace is a great Judge, and his election will insure to the Court of Appeals services which will dignify the bench and well maintain its position in the confidence of

the bar and the people. The Republicans of New York take this opportunity to congratulate the people upon the wise and excellent administration of Governor Frank S. Black. His policy has been marked by a careful attention to the details of the State Government, by its prudent regard for economy in public expenditures, and by its energetic measures for the preservation of the for-ests, the improvement of the canals, the intelligent reform of the civil service, the completion of the Capitol, the extension and improvement of the penal and charitable institutions, the reform of the election laws, the settlement of the excise question and the passage of laws in the interests of the working people.

Governor Black's Administration.

In the accomplishment of all these beneficent works Governor Black has had the steadfast support of the Republican Legislature. The finances of the State have been administered with such care that nothwithstanding the espenditure of a full million of dollars for the acquisition of forest lands and other great appropriations looking to the completion of the Capitol and the extension of the canal system, the tax rate is lower than ever and amounts to only 2.67 mills. So successful has been the operation of the revenue laws revised by the Republican party, placing the heavier burdens of taxation, upon the sales of liquor, upon inhertances and upon accumuated capital, that there prectically exists in the State of New York no such thing as direct taxation.

Much falsehood is being circulated from Democratic sources concerning the operation of the Liquor Tax law. The precise truth is shown in the following comparisons: Under the old license law 83,437 places were licensed to sell liquor in the State of New York, and the net revenue was \$2,921,369,28. Under the new law only 28,221 places are permitted to sell liquor, while the get revenue to the State amounts to the enormous sum of \$10,725, 80.23. So that the number of places where liquor may be sold has been reduced by the number of 5,216, while the revenue has been increased in the sum of \$7,804,-\$10.60. The constant charge of Democratic politicians is that the cities are being taxed for the benefit of the country, but the charge is absolutely false Of the net revenue derived from the liquor tax certificates, the State's share last year was \$7,584,629.92, and the localities' share was \$7,141,459.26. The revenue derived from New York City amounted to \$4,896,348.79, of which Pevenue derived from New York City amounted to \$1,535,543,75, of which \$2,752,220.19 was immediately refunded to the municipality, while \$1,632,114,60 passed into the treasury of the State, but in the division among the counties of the States a revenue, \$1,646,667.50 was expended by the State within and for the county of New York. So that as a matter of fact the people of New York City got a little more than they gave.

The Republican State Committee submits to the people of New York the

record of the Republican party in the nation State, county and municipality, and asks a vote of confidence.

A committee representing the Democratic Alliance, the oldest organization supporting the Chicago platforms in this section, tendered the nomination for Mayor of the Greater New York yesterday to Henry George. As exclusively published in the Journal on Friday, the chairman of the United Democratic Organizations, Robert Stewart, deciared Mr. George the first choice of the organization he represents. The two wings of the local free silver movement are now a unit as to the man whom they desire to head the ticket, and the indications are that the convention called for September 27 by the United Democratic Organizations will meet on that day and adjourn until October 1, the date set for the convention of the Democratic Alliance, in order that the candidate may be named jointly.

The offer of the nomination to Mr. George, while made informally, had all the force and effect of an offer by the Alliance, as the committee was authorized to take such action shortly after midnight yesterday at a regular meeting of the Alliance. The spokesmen of this committee were Charles E. Stover, secretary of the Alliance, and Edward A. Curley, of the Bimetallic League. Henry A. Goulden, the president of the Alliance, was chalrman of the committee, but business engagements prevented him from calling upon Mr. George. He however, delegated his authority to Mr. Stover.

Mr. George listened to the growners.
